

Suggested Summer Educational Growth Opportunities for Grades 1-2

Math

Review addition and subtraction facts—This is a simple exercise but very critical. Flashcards are a great way to learn facts.

Second graders going into third grade should start practicing multiplication facts.

Students can practice telling time, counting money, and measurement.

Reading

Students can read books, magazines, short stories, poetry, and newspapers. Students should read a *minimum* of 15 minutes a day.

Students can access a library of books and short stories on <https://www.activelylearn.com/>. Books can also be checked out from their local library. Some libraries have curbside pick-up or downloadable books.

Not sure what to read? There's a plethora of books to select from RazKids. Student accounts will still be accessible during the summer. ☺

<https://www.raz-plus.com/>

Writing

Students should write a minimum of 10 minutes a day. Suggested ideas:

- Journal
- Write a short story
- Write a letter to a relative and put it in the mail
- Email a friend (or teacher)

Science and Social Studies

There is a variety of educational information at <https://ed.ted.com/>

NASA, museums, and zoos from around the country have virtual tours you can check out online.

More Information

Students can also practice tying shoe laces!
